## **DETAILED ACTION**

### ***Specification***

1. The disclosure is objected to because of the following informalities: On page 8 of the specification, the figure must be deleted and resubmitted as a figure of drawing because it cannot be published in the specification. The specification must also be amended to include a brief description of the drawing. In line 1 of claim 9, it appears that "step" should be deleted. Note that Patent No. 6,373,939 listed in the specification and on the information disclosure statement is not related to the invention.

Appropriate correction is required.

### ***Allowable Subject Matter***

2. Claims 1-13 are allowed.

3. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose a motivation for using a periodic heating step wherein the adsorbent is periodically heating to a second regeneration temperature greater than the first regeneration temperature.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references listed on the attached PTO-892 form disclose thermal swing adsorption processes.

5. This application is in condition for allowance except for the following formal matters:

The objections to the specification and claim 9 described in paragraph 1 above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
